

NATA results/ NATA Score card:

The score cards will be available on NATA website in e-format, usually, on the fourth working day after the test.

The candidate, after fourth day may check his score directly from website giving his / her candidate ID. However, print out taken by the candidate of such score card will be only for reference and information. Candidate, however, may use print out of this score card while applying for the admission if the admission authority calls for the same. Original score card will be retrieved and verified by the admission authority directly from NATA server. Only the score card stored on NATA server is valid and no print/ hard copy will be considered valid.

The NATA score shall be valid for a period of two years from the year in which the applicant appeared for the NATA Test.

NOTE: Occasionally, delays in processing may occur. Some scores will not be available on the dates specified. Please check again. Only if the score card is still not seen after 7 days, we suggest the candidate to follow the process mentioned on the website www.nata.in

NATA PASS MARK:

As per Council of Architecture admission guidelines, a candidate applying to any school / college of architecture in India should have achieved 40% score in NATA, i.e. at least 80/200, for consideration of admission into first year B.Arch.

NATA SCORING PROCESS: The Answer to each question in the 'drawing' paper will be examined by a panel of three examiners independently and the marks are averaged. It may be further subject to moderation.

During the computer based test, with adaptive testing, an examinee is administered a set of questions with a difficulty level that is specifically designed to match the examinee's ability level. The mathematical process for calculating a score in this situation incorporates the statistical properties of the questions, the examinee's performance on the questions, and the number of questions that are answered.

Drawing Section scores

The primary emphasis in scoring the drawing section is on the candidate's drawing, imagination and observation skills. The candidate's sense of proportion & perspective is also evaluated together with sense for colour and composition.

Aesthetic Sensitivity Section

The candidate's score will depend on his / her performance on the questions given and on the number of questions answered in the time allotted. □ This section is computer adaptive, meaning that the computer selects questions based on the candidate's performance on preceding questions (When correct answer is given, next question will be of higher difficulty level whereas, if wrong answer is given next question is of lower difficulty level) and on the requirements of the test design. Test design factors that influence which questions are presented to the candidate include:

- The statistical characteristics (including difficulty level) of the questions already answered.
- The required variety of question types.
- The appropriate coverage of content.

- The final score depends on average difficulty level of all questions and of those questions answered correctly. E.g. person with correct answer for less number of questions of higher difficulty level may score higher marks than someone who answers more number of questions correctly but of lower difficulty level.
- Time allotted to answer the question is between 60 and 90 seconds depending upon the question. The time remaining to answer the question is displayed on the screen. The "per second" countdown begins 30 seconds before the allotted time for that question ends. In case no answer is offered till the time ends, the question is skipped and next question appears.
- There is no Negative marking in this test.

NO REVALUATION IS POSSIBLE FOR EITHER OF THE TESTS.

B.Arch admission based on NATA Score:

A candidate may apply for admission to any of the participating institutions as per the time schedule specified by the respective appropriate admission authority, along with all the documents desired by it.
